BIOGRAPHY

I am a **fourth-year Ph.D. student from Computer Science** department at **Washington University in St. Louis**, advised by **Dr. Ulugbek Kamilov** and **Dr. Hongyu An**. My research focuses on algorithms designs and theoretical analysis for deep learning-based computational imaging. My research topics include self-supervised learning, image reconstruction, image registration, and correction of physical model uncertainty. My work has been shown to deliver real-world impact for various imaging applications, including MRI, PET, deconvolution, and ptychography.

Research Interests: Computational Imaging, Medical Imaging, Computer Vision, Inverse Problems.

EDUCATION

Washington University in St. Louis, St. Louis, MO, United States   2020.08 - Expected 2024
Ph.D. Candidate in Computer Science
Advisor: Prof. Ulugbek Kamilov and Prof. Hongyu An

Washington University in St. Louis, St. Louis, MO, United States   2018.08 - 2020.05
M.Sc. in Computer Science

South China University of Technology, Guangzhou, China   2014.08 - 2018.05
B.Eng. in Automation & B.Business in Administration (dual-degree)

WORK EXPERIENCE

Siemens Healthineers, Knoxville, TN, United States   2023.05 - 2023.08
Research Intern in the *Physics Group of Molecular Imaging*
Worked with *Dr. Jorge Cabello* and *Dr. Maurizio Conti* on a MRI-guided PET reconstruction algorithm based on deep generative models.

Los Alamos National Laboratory (LANL), Los Alamos, NM, United States   2022.05 - 2022.10
Research Intern in the *Applied Mathematics and Plasma Physics Group (T-5)*
(a) Worked with Dr. *Brendt Wohlberg* on a ptychographic image reconstruction algorithm for efficient and high-quality imaging, and *(b)* contributed on the codebase of Scientific Computational Imaging Code (SCICO).

AWARDS

- IEEE CAMSAP Student Paper Award finalist
- AAPM Imaging Best-in-Physics Awards
- Honor PhD (**top 15%**), Department of Computer Science, Washington University in St. Louis, 2021.
- 2019 Fall & 2020 Spring **Master's Fellowship** of Washington University in St. Louis (1,366.96 $/month).
- 2019 Fall & 2020 Spring **Engineering School Tuition Scholarship** of Washington University in St. Louis (15% reduction Tuition ≈ 4,500 $ in total).
- 2015 & 2016 **Annual Third Prize Scholarship** of South China University of Technology.

RESEARCH SUMMARY

Learning without Groundtruth for Imaging Inverse Problems (Self-supervised Learning)

- Propose to reconstruct free-breathing 4D MRI data using DL without groundtruth [b13][d1][c8][m1]. This algorithm has been applied to real-world MRI systems (also licensed by Siemens), facilitating down-streaming tasks of motion compensation in PET/MRI [b8] and low-field MRI [b3] systems.
- Propose self-supervised learning for deep equilibrium model with theoretical guarantees [b2].
- Propose to train DL models on unregistered noisy measurement by jointly performing image reconstruction and image registration without groundtruth [b6][b14].
- Extend learning-based optimization to CNN priors trained exclusively on noisy measurements [b17][b18][c7].

Joint Inference of Image and Unknowns in System (Blind Inverse Problems)

- Propose a principal framework for blind inverse problems that uses deep denoiser as priors for both images and system unknowns. We conducted theoretical analysis to provide mathematical guarantees [b1].
- Propose a novel DL framework for parallel MRI that jointly estimates images and coil sensitivity maps using exclusively undersampled measurements [a3][b11].

Deep Learning for Imaging Applications

- Propose a DL algorithm for fast and high-quality ptychographic image reconstruction based on deep unfolding and vision transformer [a1].
- Propose a new DL paradigm for image registration that uses a pre-trained denoiser as the prior information, and further refine the denoiser through deep equilibrium model [a2].
- Develop DL methods for quantitative MRI to reconstruct parameter maps and reduce motion-artifact [a4][b9].
- First to propose a video frame interpolation algorithm based on neural field that can achieve SOTA performance over several datasets [b10].
